1 Introduction

In retrospect, what could you have done better to reduce the time you spent solving this homework?
1) To do reduce time on this homework I could have done more dafny practice and figure out how dafny works earlier rather than later.
2. What could we (the instructors, TAs, and mentors) have done better to improve your learning experience in this homework?
2) I believe a lot of the slides from the lectures were lacking when it came to teaching us Dafny code, which is an entirely new concept to me that I struggled with all week, some of the TAs did not actually know how dafny worked and were not able to help me with figuring out how to solve the second dafny code.
3. What do you know now that you did not know before beginning the homework?
3) Even though I still do not know enough about dafny syntax, I still feel way more confident than I felt before on dafny and figuring out things like loop invariants and assertions.
